Change your cart's color, seat color, model, and name.

Page 4: Adjust Interior Lighting

Control light and dark modes, brightness, accent lights, and LED colors.

Page 5: Update Your Cart

How to install the latest screen software using a USB drive.

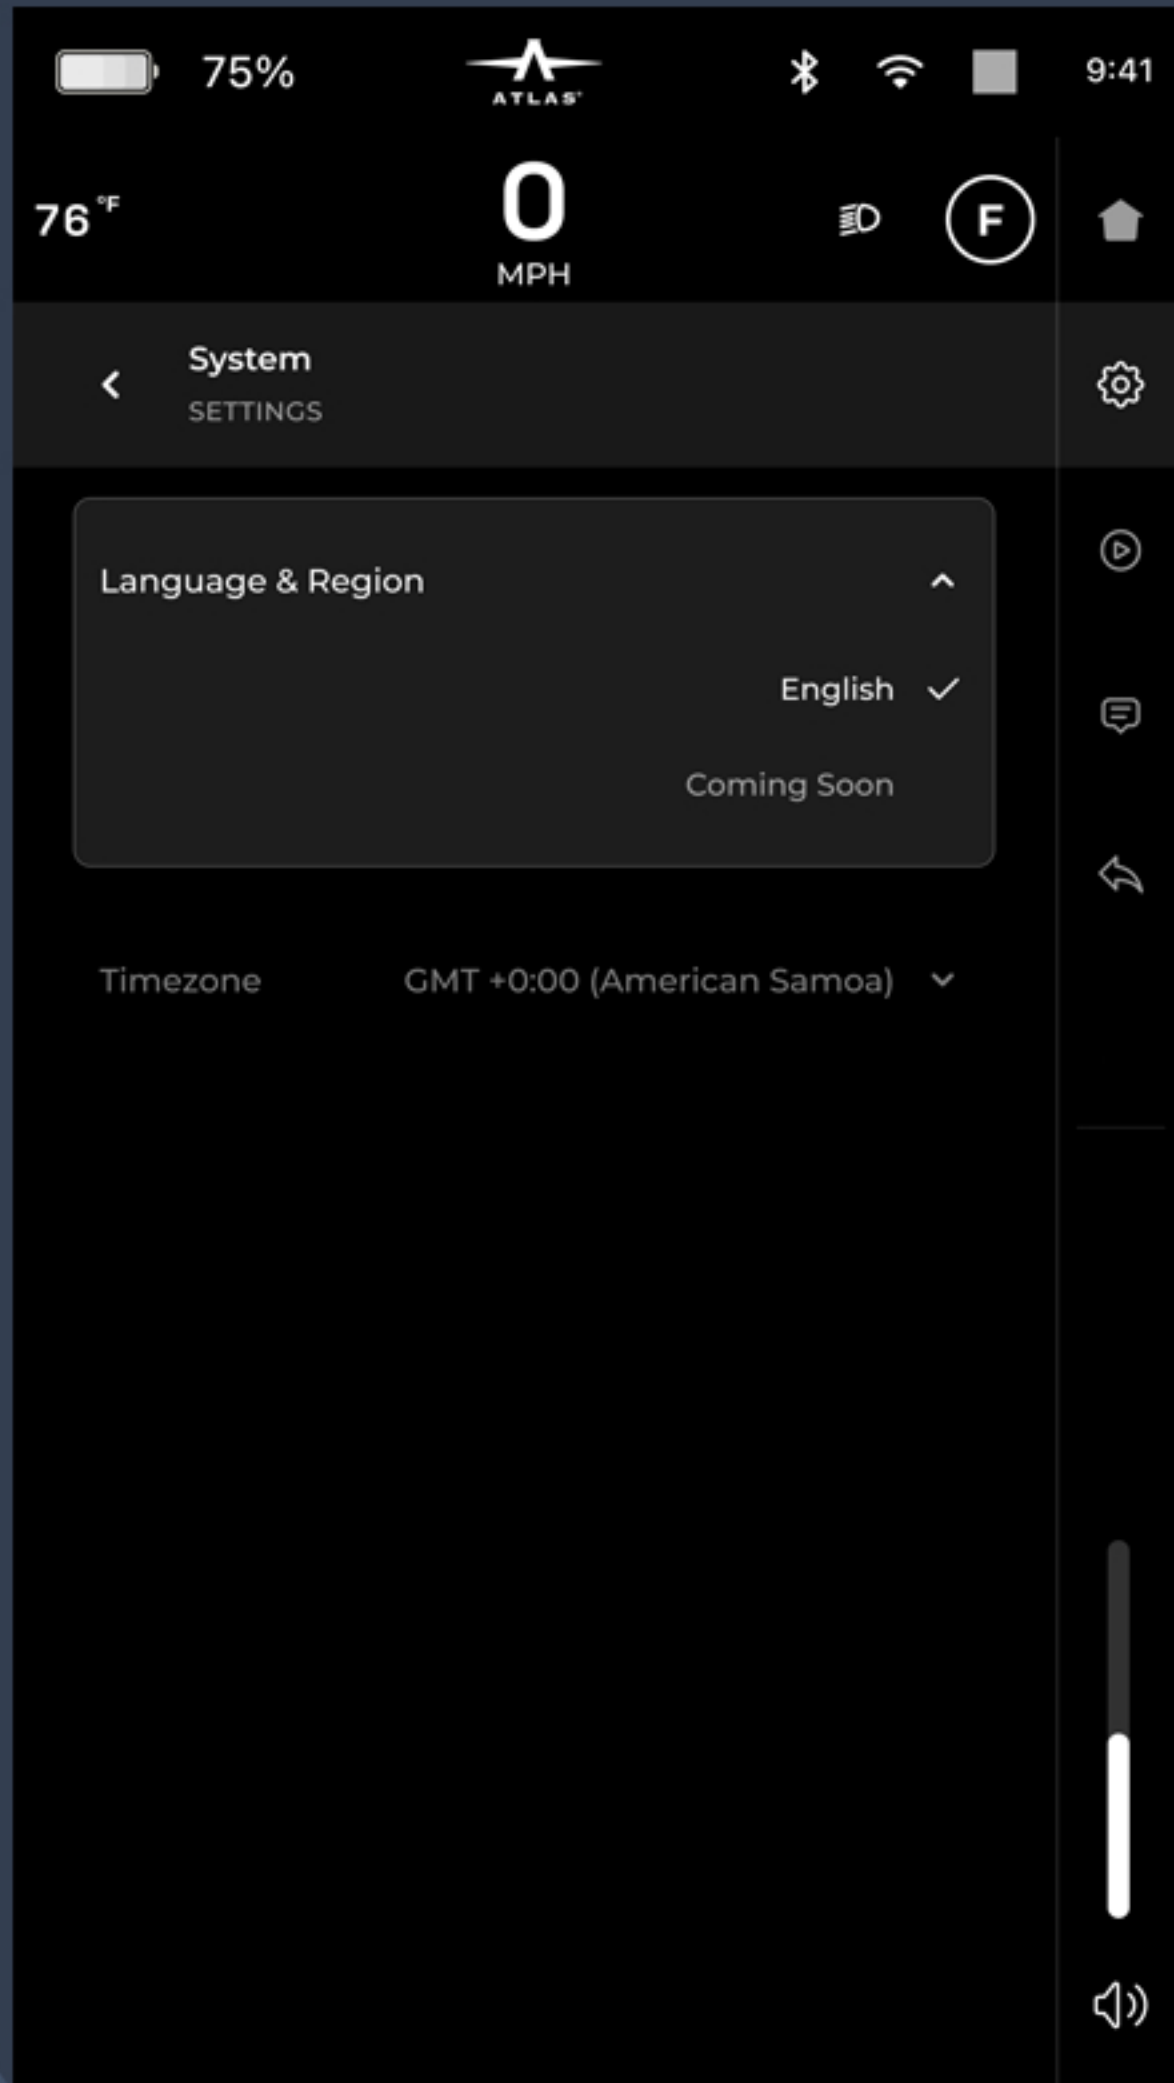

Page 6: Adjust Your Sound Settings

Fine-tune bass, treble, and balance to personalize your audio experience.

Page 7: Troubleshooting

Common questions and quick solutions for your Atlas infotainment system.

Settings up Time/Date

You can adjust your system clock or let your cart set it automatically.

1. From the *Home Screen*, tap the *Gear icon* (⚙️) to open *Settings*.

2. Select *System*, then choose *Date & Time*.

3. To set the time automatically, tap *Use network-provided time*.

- Choose *Use GPS-provided time* to let your cart set the date and time based on your current location.
- Choose *Use network-provided time* if your cart is connected to Wi-Fi or a tethered phone.

4. To set manually, select *Off*, then adjust *Date* and *Time*.

5. Tap *Select time zone* to choose your region.

Your selections save automatically when you return to the home screen.

Tip: GPS-provided time updates as you travel across time zones. It may take up to a minute to update after startup or when signal is weak.

Phone Tethering

1. On the *Home Screen*, tap the *gear icon* (⚙️) icon.

2. Tap *Bluetooth*.

3. Turn *Bluetooth On*.

4. On your phone, open Bluetooth, select the cart's name shown on screen, and enter the PIN (0000 by default).

Note: You can also change the cart's name and PIN in the cart's Bluetooth menu.

5. If your phone supports *Android Auto* or *Apple CarPlay*, you'll see a prompt on your phone asking to connect. Accept to pair and complete setup.

- If your phone doesn't prompt you to pair, tap the *Phone Tethering* icon (📶) to open the menu manually.

6. If you don't want to use Android Auto or CarPlay, deny the request—your phone will stay connected by Bluetooth only.

7. If you aren't prompted to pair, check the bottom-left corner of the *Phone Tethering* screen:

- The (📶) icon is for *Android Auto*.

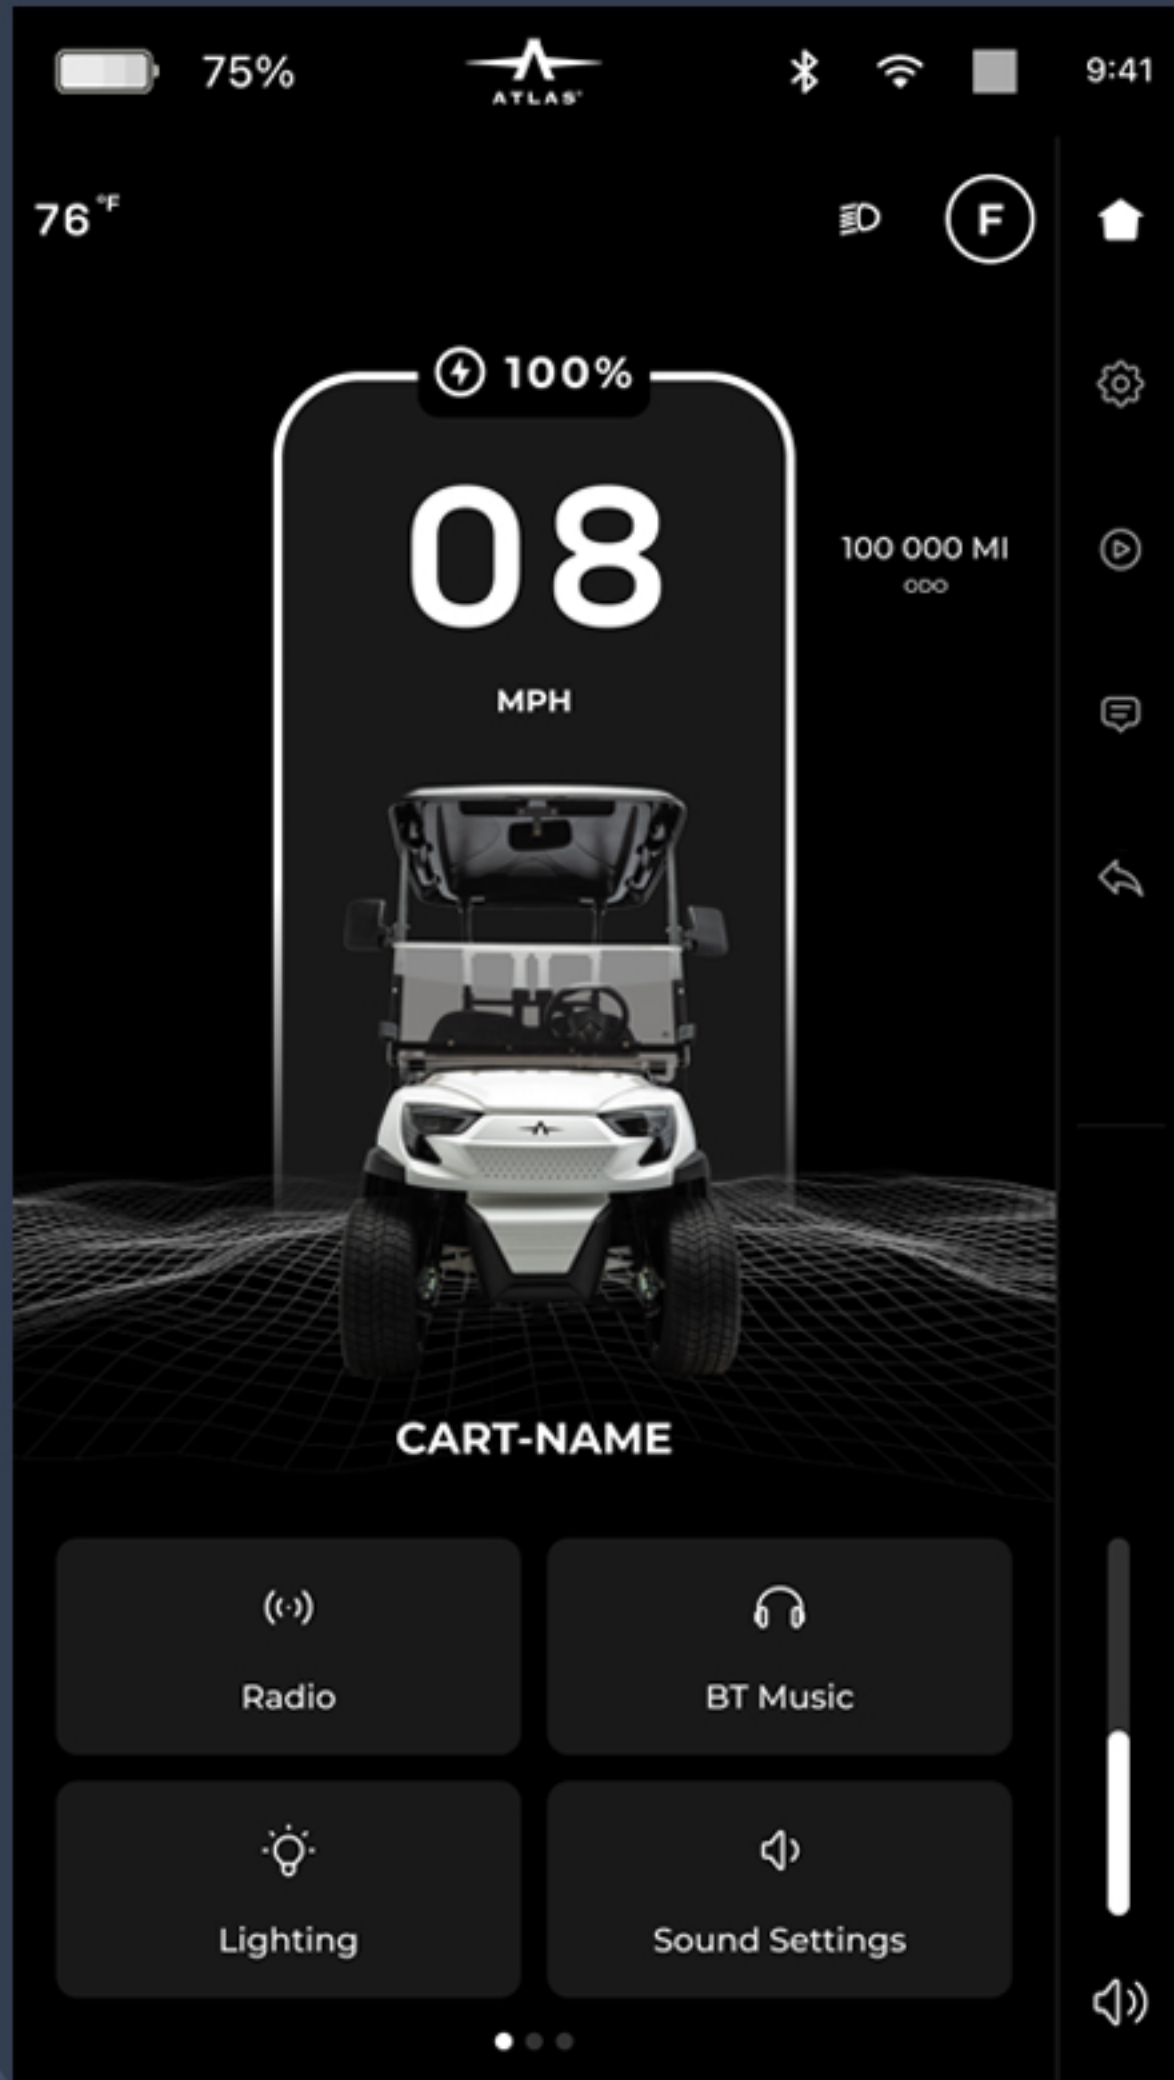

- The (📱) is for *Apple CarPlay*.

Tap the icon to switch if it's not showing the one you want.

8. Leave *Auto Connect* on if you want the system to reconnect automatically next time.

Customize Your Home Screen

You can change how your cart looks and how it appears on the display.

1. From the *Home Screen*, tap the *gear icon* (⚙️).
2. Select *Cart Profile*.
3. Tap *Cart Color* to choose the body color shown on the screen.
4. Tap *Seat Color* to change the seat color on the display.
5. Tap *Cart Model* to select your cart's model.
6. Tap *Cart Name* to rename your cart.

Note: This name is also used as your Bluetooth name.

Your changes appear right away on the home screen.

Customize Cart's Interior LEDs

You can open Lighting from the home screen or through settings.

Option 1:

From the *Home Screen*, tap the *Lighting* button (bottom-left of the four center buttons).

Option 2:

Tap the *gear icon* (⚙️), select *Cart Settings*, then tap *Lighting*.

Lighting Options

Dark/Light Mode – Turn on for light mode or off for dark mode.

Daytime Brightness – Adjusts the screen brightness while using light mode.

Nighttime Brightness – Adjusts the screen brightness while using dark mode.

Auto Mode – When on, your cart switches between light and dark mode automatically based on surrounding light.

Automatic Brightness Adjustment – When on, screen brightness adjusts automatically to match lighting conditions.

Accent Lighting On/Off – Turns tweeters and accent lights on or off.

Tweeter Light & Turn Signal – When on, tweeter LEDs flash with turn signals or hazard lights.

Lighting Style – Changes lighting patterns for the tweeter LEDs and wireless charging cubby.

Lighting – Adjusts the brightness for the tweeter LEDs and wireless charging cubby.

Color Wheel – Tap a color on the wheel to set the color for tweeter LEDs and the wireless charging cubby. (Tap, don't drag.)

Your lighting changes apply immediately and save automatically.

Updating Your Cart

1. Use an empty **USB drive (8–32GB)**.
2. Find your cart's **USB port**:
 - Some models have it **under the passenger-side cup holder** (pop the cup holder off).
 - Others have an exposed port underneath the cart.
 - Check your manual if unsure.

Note: The two USB chargers next to the cart's tweeters do **not** transfer data and **cannot** be used for updates.

3. From your **dealer portal**, download the latest screen software to the USB drive. (*Customers, contact your dealer for assistance.*)
4. Insert the USB drive into the cart's USB port.
5. Power on the cart and press **Agree** when prompted.
6. Stay on the **Home Screen**. The update window will appear within a minute.

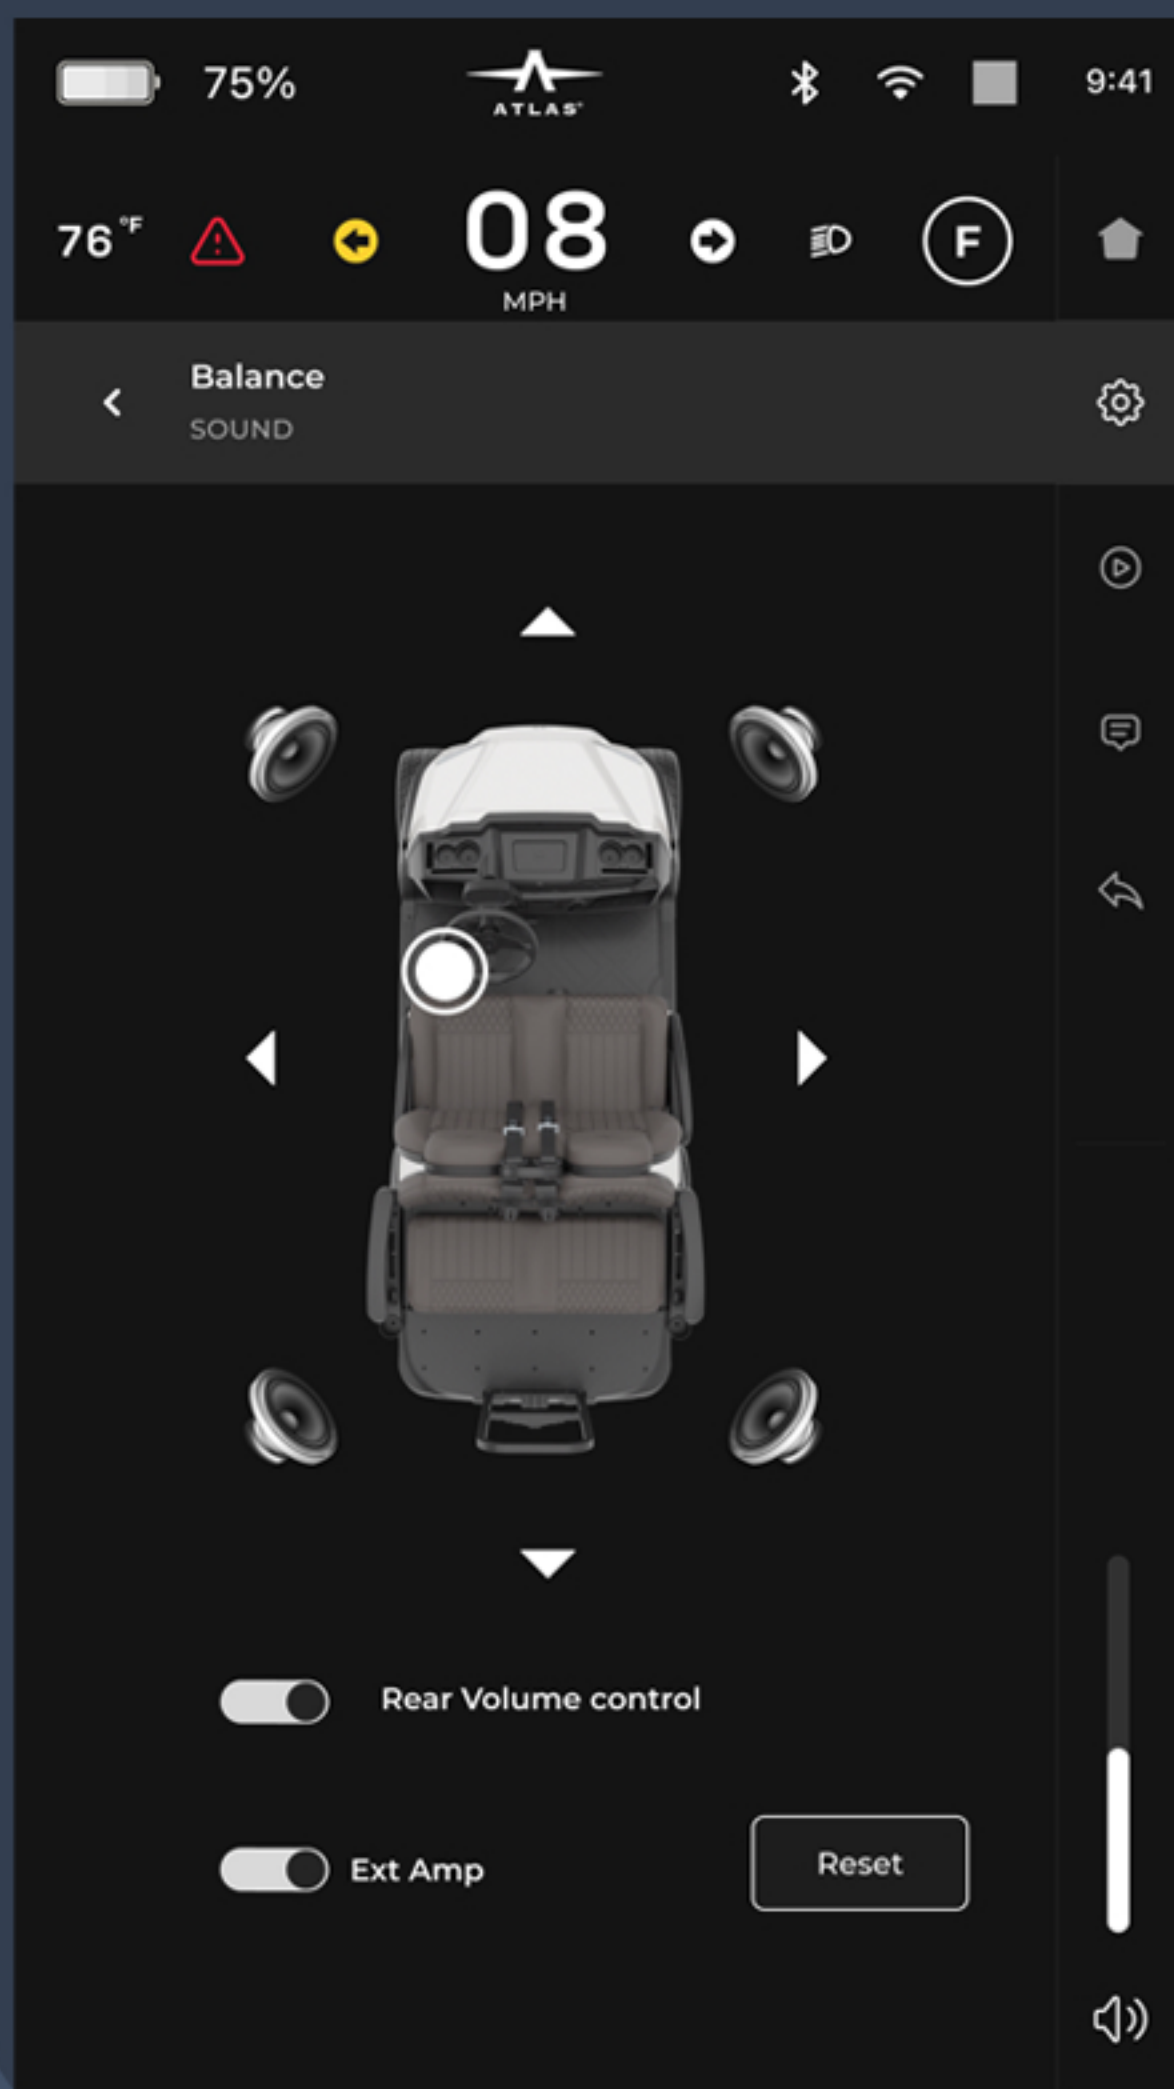

7. Leave the cart **on** while the update runs. The display will turn off, restart, and show a progress bar.

8. If no update window appears, **remove and reinsert** the USB drive or **power cycle** the cart.

9. When the update finishes, the screen will restart and return to the **User Agreement** page. You can remove the USB drive once this page appears.

Sound Settings

You can open Sound Settings two ways.

Option 1:

From the *Home Screen*, tap the *gear icon* (⚙️) to open *Cart Settings*, then tap *Sound*.

Option 2:

Tap the *Sound* button on the home screen (bottom right of the four center buttons).

Sound Options

Bass – Adjusts low-end sound.

Treble – Adjusts high-end sound.

Balance – Moves sound between left and right speakers.

Fader – Moves sound between front and rear speakers.

Volume Limit – Sets a maximum volume level.

Equalizer (EQ) – Selects preset sound profiles.

Subwoofer Control – Adjusts subwoofer output if equipped.

Your sound changes apply instantly and save automatically.

Troubleshooting

Q: How do I switch between phones, or between Android Auto and Apple CarPlay?

A: The cart connects to the last paired phone. To use a different one, turn off Bluetooth and Wi-Fi on the current phone, then connect the new phone. If the phones use different operating systems, open Phone Tethering and tap the bottom icon to switch between Android Auto (▲) and Apple CarPlay (Ⓢ).

Q: Can the cart's name change automatically based on who's driving or which phone is connected?

A: No, the cart's name doesn't change automatically. It stays the same until you manually update it under Cart Profile in the settings.

Q: Why does the date and time reset

A: When the cart enters sleep mode, the infotainment system temporarily loses system power, which can reset the date and time. We're currently developing a fix for this issue.
